Work Experience

UAT Tester — **Sun life Indonesia** — **Mar 2025 - Now**
Jakarta, Indonesia

Sun Life Indonesia is a **life insurance** company that provides financial protection through products such as **life insurance, health insurance,** and **investment-linked plans**. It is part of **Sun Life Financial Inc**., a leading global financial services organization operating in multiple countries worldwide.

- **Test Planning & Requirement Analysis –** Created test cases and analyzed requirements from product, finance, and compliance teams to ensure system updates comply with business needs, regulatory standards, and internal policies.
- **Production Monitoring –** Monitored daily application performance and production systems to maintain stability, identify potential issues early, and provide regular status reports to the team.
- **Issue & Bug Resolution –** Handled and resolved production issues and bugs reported by life advisors, collaborating with development teams to implement timely and effective solutions.
- **User Acceptance Testing (UAT) –** Conducted UAT with end users to validate new features, gathered feedback, and ensured the application functions correctly before release.
  Training & User Support – Delivered training sessions to life advisors on the latest application features and updates, enabling effective system usage and reducing operational errors.

QA Analyst — **AXA Mandiri** — **Apr 2024 - Feb 2025**
Jakarta, Indonesia

AXA Mandiri is a joint venture between **PT Bank Mandiri (Persero) Tbk** and the global insurance group **AXA Group**. The company focuses on providing **life** and **health insurance** products and services in Indonesia, aiming to deliver long-term financial protection and security for individuals and families. www.axa-mandiri.co.id

- **Test Planning & Execution** – Developed and executed test plans and test cases following QA methodologies and the STLC process to ensure comprehensive test coverage and product quality.
- **API & Database Testing** – Performed manual and automated API testing using Postman, Katalon, and JMeter, validating data integrity through SQL queries.
- **Functional & Integration Testing** – Conducted functional and integration testing on AS400, ensuring data accuracy and seamless system functionality within core banking operations.
- **User Acceptance & Build Verification Testing (BVT)** – Led UAT with business users, executed BVT (Smoke Testing) post-deployment, and validated overall system stability.
- **Defect Management & Collaboration** – Managed defect tracking in JIRA, collaborated with developers and business analysts, and performed **regression testing using Katalon** to maintain system reliability.

QA/QC — **Asuransi Astra Buana** — **Jun 2022 - Mar 2024**
Jakarta, Indonesia

Asuransi Astra is an Indonesian insurance company providing various insurance products, including **vehicle, property, health, and travel insurance,** focusing on comprehensive coverage and customer service. Link: www.asuransiastra.com

- **Mobile Application Testing** – Conducted **functional, UI, and API testing** on **Android and iOS** apps, ensuring seamless navigation, responsiveness, and backend integration.
- **UAT & Business Collaboration** – Supported **User Acceptance Testing (UAT)**, gathering feedback from **HR users**

and business stakeholders to improve usability and system efficiency.

- **Data Validation & Compliance** – Verified **policy data, tax calculations, and insurance records**, ensuring accuracy and regulatory compliance.
- **Defect Management & Regression Testing** – Tracked and prioritized defects in **JIRA**, worked closely with developers, and conducted **regression testing** to ensure system stability.
- **Test Case Design & Execution** – Designed and executed **test cases** for various application modules, ensuring comprehensive coverage and adherence to QA standards.

BA Implementer **PT Dopay Aplikasi Indonesia** **Mei 2020-Dec 2020**

Bandung, Indonesia

Dopay is a leading Bandung-based software house specializing in custom **web and mobile app development**. They serve regional government and private companies in West Java, delivering innovative solutions tailored to client needs.

- **Requirement Analysis & Documentation** – Gathered, analyzed, and translated business requirements into **BRD** and **FSD**, ensuring alignment between business needs and system functionalities.
- **Design & Prototyping** – Created **wireframes, mockups, and prototypes** using **Figma, Adobe XD, and Sketch** to improve user experience and meet business goals.
- **Testing & Validation** – Designed **testing workflows**, conducted **UI validation, UAT**, and ensured functionality, responsiveness, and cross-browser compatibility.
- **Stakeholder Collaboration** – Acted as a bridge between business and technical teams, ensuring clear communication and seamless implementation of solutions.
- **Change Management & Optimization** – Maintained and updated **BRD & FSD**, tracked system modifications, and leveraged data analytics for continuous product improvements.
